

Knowledge Automation  
Expert System Software

Hundreds of universities use Exsys products for the instruction of expert system / decision-support theory within their curriculum. Exsys software is also in use by over 50% of Fortune 100 companies, many Government agencies, and thousands of businesses, organizations and research institutions.

**Exsys Corvid** is a proven approach to developing and fielding interactive knowledge automation expert systems – for the Web. Corvid's design resulted from an extensive examination of what is needed in today's Internet-oriented world. The Web provides overwhelming amounts of information – Exsys Corvid systems analyze information to provide expert answers and recommendations.

Exsys has a proven history of building realistic and practical tools, which enable domain experts to be able to develop their own systems without having to learn complex programming syntax or knowledge engineering practices.

Exsys Corvid is particularly well suited to the academic environment. It is easy to teach, and quickly enables students to go beyond building "toy" systems and become very proficient at building practical career-focused expert systems. It uses a Windows-standard interface which students are immediately comfortable with.

Corvid's unique development environment structures and simplifies the logic authoring process. It also provides the ability for systems to rapidly be deployed on actual Web sites using Java applets. Students learn expert system theory faster and in a way that can be immediately applied to their future and current workplaces.

Please visit the Exsys web site at [www.exsys.com](http://www.exsys.com). You can run sample systems and learn from case studies. We encourage you to contact us today to discuss how Exsys works best in the classroom, and the best approaches to building, deploying and integrating knowledge automation expert systems.

---

**License provisions:** Licenses are not transferable once they are installed and activated. Licenses are for classroom use only. Use of this license, or systems built with this license for any purpose other than to fulfill classroom course requirements is strictly prohibited.

## Exsys Corvid University Classroom License Program

### The Exsys Corvid Knowledge Automation Expert System Development Classroom License Program includes:

- A full-function, Exsys Corvid Single Developer/Computer/Server License for the instructor.
- Up to 50 student key codes per semester. Codes convert the Exsys Corvid evaluation software to run for 120 days, and allow systems of up to 250 nodes to be built.
- A non-commercial, unlimited distribution license of the Exsys Corvid Java Applet Runtime so students can run their systems on an actual Web site during the license period.
- PowerPoint training slides for teaching Exsys Corvid (over 300 slides).
- Two "Quick-Start" tutorials and one Advanced Tutorial as a PDF files.
- Exsys Corvid full product manual as a PDF file.
- One FREE full year of instructor technical software support and upgrades including additional student codes as needed. (Note: must be renewed annually to receive latest software and student codes.)
